## ***Corval Group Reaches Major Safety Milestone Eight Million Hours Worked with No Lost Time Injuries***

ST. PAUL, MN, June 29<sup>th</sup>, 2018 - Corval Group continues to pursue its vision of "No One Gets Hurt" with the achievement of 8,000,000 hours worked without a lost time injury. The company, where safety is a foundational value, has created a proactive culture of safety awareness in an industry strongly associated with its inherent hazards. The company's last lost workday occurred in 2008.

Delivering value to customers and employees is essential to Corval Group's business. An important way to achieve this is to develop a strong safety culture and supporting systems. Hallmarks of the firm's safety practices include empowering any person on a project site to halt unsafe work (Stop Work Authority), and a SPOT recognition program that emphasizes safety awareness through positive reinforcement.

"We are proud of all the men and women who safely deliver the Corval Experience on every job we perform," said Jim Simon, president and chief operations officer at Corval Group. "

By recognizing the importance of safety in the workplace and emphasizing personal safety in all aspects, Corval remains in the top of its class. Corval Group will continue to strive for world class safety on job sites, in the office and at home, by assuring every next task is completed incident free.
